TRBOnet.Professional is a PC based client-server dispatcher software application for the **MOTOTRBO™** Professional Digital Two-Way Radio System and uses capacities of a digital standard DMR and IP protocol embodied in **MOTOTRBO™** radio.

TRBOnet.Professional features

- + Voice Communications Management + Voice Recording
- + Intercom
- + ARS Functions + Status Monitoring
- + GPS Positioning (raster or vector maps)
- + GeoFencing
- + Group and Personal calls, Remote Monitoring
- + Text Messages
- + Telemetry Support
- + Event Logging
- + Reporting
- + Lone Worker
- + Stun Kill "passive"
- + TCP Data Encryption

Where to use TRBOnet

MOTOTRBO™ with **TRBOnet** can be used in any environment that demands high quality communication and reliability in industries such as Security, Transportation, Hospitality, Construction and many more. **TRBOnet** uses the **MOTOTRBO™** platform to its full potential. Nothing else compares.

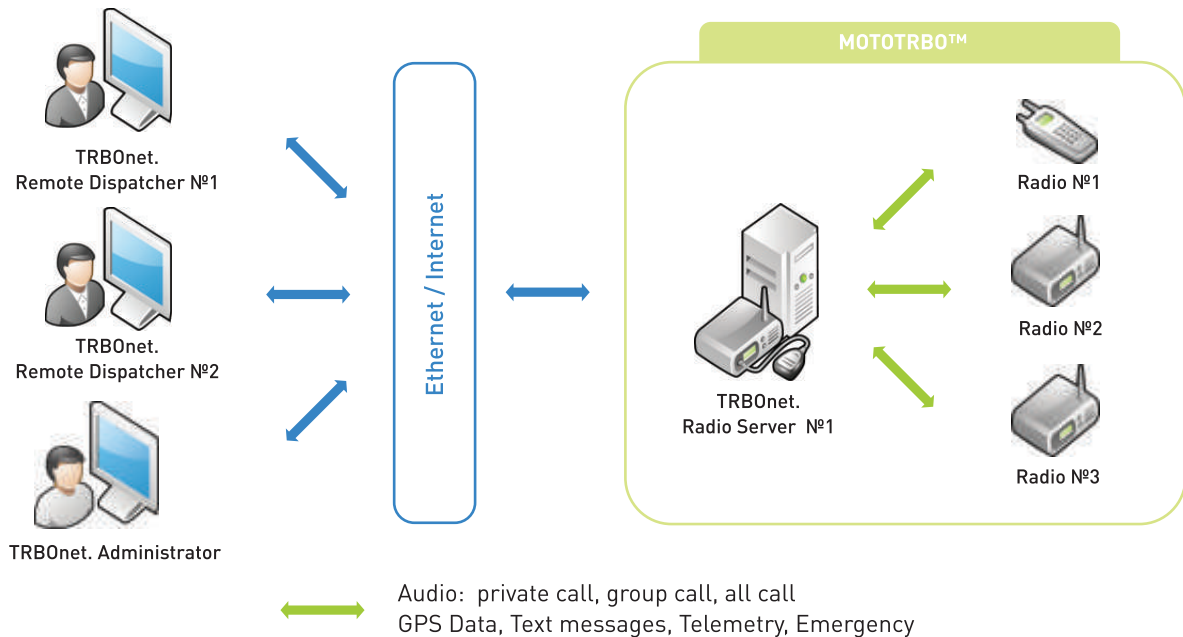

What will TRBOnet do for you

TRBOnet's feature full system will provide your business with

- + Asset Tracking
- + Text Messaging
- + Remote Dispatchers
- + Detailed reports
- + And much more

With these features you can track what's important to you on a live map, send and receive private text messages to employees in the field. Remote dispatchers allows multiple dispatchers which can be located anywhere as long as they have internet access and Detailed reports give you exact information on items that matter such as audio recordings, texts sent, radio status (on/off) and much more.
